UNIVERSITY OF WISCONSIN River Falls

College of Arts and Sciences

A total of 120 semester hours is required for graduation. One full year of work (30 credits) must have been done in residence and the last 15 credits for the degree must have been done in residence unless the dean of the college permits an exception. A candidate must have an honor point average of 2.25 in advanced courses (numbered 300 and above) in the major field of specialization and must have an overall honor point average of 2.0 to graduate.

Liberal Arts Degrees

<p>General Education: 38 cr. hrs. Major: 34-36 cr. hrs</p>	<p>Requirements for this degree are identified in the Art Major.</p>	<p>General Education 38 cr. hrs. Major/Minor (Major 34-36/Minor 21-24) 55-60 cr. hrs.</p>

Options in the Liberal Arts Degrees

To provide flexibility for programs in the Bachelor of Science degree, students are provided the following options:

Standard Option

A departmental major (usually 34-36 hours) and a departmental minor (usually 21-24 hours) or a broad field major (usually 56-60 hours).

Individualized Interdisciplinary Option

A special program of studies intelligently arranged around the particular academic and professional needs of the student. It generally consists of the core of a major along with an interdepartmental grouping of courses in a minor reflecting a career/learning focus for a minimum total of 60 credit hours. Designed in consultation with the student's adviser before beginning the junior year, it must be submitted to and approved by the Dean of the College of Arts and Sciences at that time. The proposed program is accompanied by a letter from the student justifying the purposes of the program in relation to the student's needs and a letter of validation from the adviser.

Professional Option

A broad program of studies basic to later professional work. A student transferring at the conclusion of the junior year to a professional school may have a part of the work in the professional school applied toward the senior year for the bachelor's degree. Details must be worked out by the student and the adviser and approved by the Dean of the

College of Arts and Sciences before the junior year. A Dual Degree-Physics, Chemistry and Engineering is available

Internships in the College of Arts And Sciences

The Internship Program offers the student a number of opportunities for earning credit in work and training off campus and on campus. This internship is open to those students who have completed at least 60 credits of course work. Internships may be arranged for up to 12 undergraduate credits in the student's major or minor field, depending upon departmental allowances. Credits may be earned all in one semester or summer, but in no more than two academic terms, two credits being the minimum for any one internship; some departments have a higher credit minimum. The internship courses are numbered 379.

A sophomore level internship course, numbered 279, is also offered by many departments. These internships are identified as "introductory professional work experiences."

The fee schedule for the interning student will be the same as the fee schedule for an on-campus student. Each department, with the approval of the Dean of the College, will decide the appropriate number of hours for each internship, according to the level of the work experience in relation to upper division courses, the extent of work involved and the relationship of the work to professional academic pursuits. Individual departments will determine if internship programs can substitute for required courses in the major or minor field. A minimum number of 45 work experience hours per week for the semester is required for 12 credits.

Internship proposals may be initiated by the student, the major or minor department or off-campus agencies. Planning with the academic adviser for an internship should precede the semester in which the proposal is submitted. Some applications for an internship should be submitted to the department chair for approval while other applications should be submitted to the dean of the college for approval at least six weeks prior to the intended start of the internship, after its first having been processed and approved by the faculty adviser and department chairperson. Students must register for the internship credits during the semester the internship is conducted in order to receive credit. The work supervisor and faculty adviser will evaluate the student's experience. The department will require additional evaluation, the methods to be worked out between the student and his/her faculty adviser within the guidelines of the college. A summary written by the student is submitted to the dean along with the two evaluations prior to the submission of a grade

Independent Study and Directed Readings

In accordance with university policy, the College of Arts and Sciences offers independent study through most

departments. Additionally, most departments offer courses in directed readings. Independent Study (numbered 499) is defined as an individually designed topic or course of study or unstructured research to meet the needs of a student. Directed Readings (numbered 490) is a course that is generally prescribed as to its content, materials and activities; it may be used to instruct students in the materials of a given course when that course is taken out of sequence or individually, but under the direction of an instructor.

Students will be limited to nine credit hours of independent study course work and nine credit hours of directed readings but with a combined maximum of 12 credit hours within the 120-credit degree program. Individual departmental courses of study may allow fewer such credits than this maximum for their majors or minors. From one to three credits may be taken in each of these courses in a given semester, depending upon departmental requirements and availability. Students should plan for such courses with their major adviser. Application for independent study or directed readings must be processed through the department chairperson for approval of the course proposal and assignment of a faculty adviser

College Interdepartmental Offerings

Interdepartmental courses are typically identified by and listed in the departments which offer them, such as, BIOL/CHEM 343 - Microtechniques and Electron Microscopy or ENGL/GEOG/HIST 385 - Interdisciplinary Seminar on the American Frontier.

College of Business and Economics

Admission Standards for all majors in the CBE

Minimum GPA of 2.50 is required in the lower level CBE courses. Completion of at least 27 required general education credits with a minimum GPA of 2.25. Additionally, the following must be completed, or in progress for completion, during the semester preceding admission. Students may register prior to acceptance, but acceptance is required for attendance in CBE upper-level courses. Students with CBE Lower Level GPAs between 2.25 and 2.50 may petition the Assistant Dean for consideration on a case-by-case basis.

For admission to accounting and business majors:	For admission to the computer science and information systems major:	For admission to the economics major:

GPA of 2.50 in <u>CBE 100</u> , <u>ECON 201</u> , <u>202</u> , <u>205</u> ; <u>ENGL 100</u> , <u>200</u> .

Degree Requirements

To obtain a degree in the College of Business and Economics students must acquire a minimum of 120 semester hours. In order to complete a degree in four years, students need to take approximately 15 appropriate credits per semester. Students are encouraged to use advanced placement credits and transfer credits to provide flexibility in their programs and to expand their educational backgrounds. The Admissions Office, the College of Business and Economics student adviser, and faculty advisers will assist students to maximize their educational opportunities in an efficient manner.

The College of Business and Economics degree consists of the following components:

- General Education Requirements
- **University Requirements:**
All students are required to take an American cultural diversity course and a global perspectives course. The American cultural diversity and global perspective requirements can fulfill another requirement in a student's major/minor program, if appropriate. These two university requirements need to be completed in any degree program and are not general education requirements.
- **Major:**
All students earning a major within the College of Business and Economics must complete at least half of their 120

credits required for graduation outside the college. In addition, they must complete at least 50 percent of the business credits in the College of Business and Economics at UW-River Falls.

Students majoring in Economics have the choice of graduating from the College of Business and Economics or from the College of Arts and Sciences. Students who graduate from the College of Arts and Sciences must meet that college's requirements.

• **Minor**, if required:

In addition to the standard minors listed (Option A), College of Business and Economics students can design their own minors to meet their individual educational and career goals (Option B).

• **Electives:**

As required to reach a minimum total of 120 credits.

College of Education and Professional Studies

Admission to Teacher Education

Application for admission to teacher education is made through the Dean of the College of Education and Professional Studies. Students should begin the admission to teacher education process when they have completed 40 semester credits of course work.

Students in the middle/secondary education program must be admitted to teacher education before they are permitted to enroll in the following methods courses: TED 420, TED 422 and the appropriate methods course(s) in the major(s) and/or minor(s) TED 429-441.

For students in the elementary education program, admission to teacher education is a prerequisite for enrollment in the following Block I courses: TED 312, TED 315, TED 317.

Students majoring in agricultural education apply for admission to teacher education through the department of agricultural education.

Admission to Teacher Education is based on requirements of the Wisconsin Department of Public Instruction and the College of Education and Professional Studies.

Current information is available in the student handbook and on the college website. Students are responsible for checking the website for the information they will need.

Praxis I Preprofessional Skills Test (PPST) Requirement: The Praxis I (PPST) is generally taken during your first or second year of college. You must pass all sections of the Praxis I (PPST) before you can be admitted into the Teacher Education program.

Students are required to have a minimum of 150 semester credit hours in order to sit for the CPA exam in Wisconsin. For education requirements to sit for the CPA exam in Minnesota, please contact the Minnesota State Board of Accountancy.

Students should plan to take MATH 146 (if necessary) before taking MATH 156 or ECON 205 as required in General Education. The lower division course requirements must be completed before the student begins the upper division requirements and the required accounting courses. A 2.5 grade point average must be maintained in the required accounting and business law courses to graduate with a major in accounting.

Undergraduate Accounting students may not transfer more than six credits of 300/400 level courses from non-AACSB accredited programs and

Computer Science (not CSIS 105 or CSIS 151),
ENGL 251 or ENGL 367.

The Adapted Physical Education minor is for students seeking teacher certification to meet the needs of students with disabilities within Physical Education. This certification is an "add-on" minor for Physical Education-Comprehensive K-12 Physical Education (teacher certifiable) major as part of the baccalaureate program or as a post-baccalaureate program. It is not a stand-alone minor for students seeking any other major. The undergraduate Health and Physical Education Major must complete the PED 370 Adapted Physical Education Practicum course **PRIOR** to student teaching.

State licensing boards grant the Professional Engineer or P.E. title to engineers who meet certain requirements in education, experience and exams. Generally, P.E. candidates are required to have a B.S. degree from an ABET-accredited engineering program, 4 years of work experience, and passing scores on both the Fundamentals of Engineering (FE) exam and the Principles and Practice of Engineering (PPE) exam. The FE exam is taken by graduating seniors of the Agricultural Engineering program, and the PPE exam is taken after at least 4 years of experience working under a licensed professional engineer. The Agricultural Engineering program is the only one on the UWRF campus in which students take the FE exam before graduating.

Agricultural Studies Major

The Agricultural Studies major enables the student to gain a breadth of knowledge in many areas within the field of agriculture, food and environmental science. A relatively large course elective component allows students to be flexible in taking courses that fit their individual needs. For example, students may elect courses in agricultural communications under this major.

Agricultural Studies

Dean's Office

210 Agricultural Science

715-425-3841

Agricultural Studies is a four-year Bachelor of Science degree program. Students majoring in Agricultural Studies will acquire broad knowledge in the fields of agriculture, food and the environmental sciences. Students may also pursue individual special interests through elective classes. In consultation with an adviser, students may choose elective courses in areas such as agronomy, animal science, communications, marketing, management, international studies, etc.

The biology department offers a 34-credit major and a 22 credit minor for liberal arts and education majors. A degree with a biology major also requires additional supporting courses in chemistry, mathematics, and physics. Three options are offered for the biology major:

1. General Biology option, for students who want to be broadly educated in biology or who are seeking education certification;
2. Biomedical Sciences option, appropriate for pre-professional majors and students planning to go into laboratory research;
3. Field Biology option, for students interested in ecological research or careers in field biology.

Karl Peterson—Director

The Biotechnology major is an interdisciplinary program that is focused on the molecular basis of life processes and the techniques utilized to both study and control these processes under in vivo and in vitro conditions. The Biotechnology curriculum draws upon the expertise and course offerings of the participating departments: Biology, Chemistry, Animal and Food Science, and Plant and Earth Science. The Biotechnology major is designed to provide those students who are interested in pursuing careers at the interface of biology and chemistry with the academic background required to either secure entry level positions in the biotechnology industry or to continue their education in graduate or professional schools. A student may elect to complete a B.S. degree in Biotechnology in either the College of Arts and Sciences, 715-425-3777, or the College of Agriculture, Food and Environmental Sciences 715-425-3841.

Courses in the major or required supporting courses may be double counted to satisfy the General Education science requirements.

Therefore, the total General Education credit hour requirement is reduced by the courses that can be double-counted.

Biotechnology

Specialization Area: 9 cr. hrs.

In consultation with a biotechnology faculty advisor, the student will develop a plan that includes at least 9 additional credits of specialization. Up to four credits may include an internship in the specialization area. The total number of internship credits distributed between the Biotechnology Electives and Specialization Area may not exceed 4 credits. The plan will be submitted to the Biotechnology Program Director by the end of the first semester of the junior year for recording and approval. The senior seminar should focus on a research project the student worked on or a topic intimately related to the area of specialization.

Some possible specialization areas/emphases might include:

Production Animal Biotechnology

Production Crop Biotechnology

Business/Management

Computational Biotechnology/Bioinformatics

Criminal Justice/Forensic Biotechnology

Environmental Biotechnology

Broadfield Science Licensure

A person with a broadfield science (BFS) license may teach any science class, middle-school level through grade 10, and any basic science class in grades 11-12 which is not a college-preparatory course, advanced placement (AP) course, or an elective course with more depth of content than a basic course. However, you may teach advanced courses in your science major (Biology, Chemistry or Physics).

Karl Peterson—Director

The Biotechnology major is an interdisciplinary program that is focused on the molecular basis of life processes and the techniques utilized to both study and control these processes under in vivo and in vitro conditions. The Biotechnology curriculum draws upon the expertise and course offerings of the participating departments: Biology, Chemistry, Animal and Food Science, and Plant and Earth Science. The Biotechnology major is designed to provide those students who are interested in pursuing careers at the interface of biology and chemistry with the academic background required to either secure entry level positions in the biotechnology industry or to continue their education in graduate or professional schools. A student may elect to complete a B.S. degree in Biotechnology in either the College of Arts and Sciences, 715-425-3777, or the College of Agriculture, Food and Environmental Sciences 715-425-3841.

The Chemistry Department offers several options for chemistry majors, all of which are based on a core curriculum with additional requirements based on each option.

1. The Bachelor of Science regular option chemistry major is designed for students who desire a general education in chemistry as a background for careers in many fields such as polymer science, environmental analysis, industrial chemistry, materials science, various fields related to medical science, etc. This consists of 35 credit hours distributed among the major fields of chemistry.

2. The ACS-Approved regular option chemistry major is offered for those students who wish to pursue a more intensive program in chemistry approved by the American Chemical Society. This program includes the

Minimum of 9 credits including at least 6 lab credits, one of which must

courses in the Bachelor of Science chemistry major and additional advanced courses. It is particularly recommended for students who intend to go to graduate school or work in the chemical industry. A course in computer use or programming and one year of foreign language are strongly recommended.

3. The biochemistry options are for those students who wish to pursue a career in biotechnology, the medical sciences or who desire a strong background in the chemistry of biological systems. The biochemistry program may be based on the Bachelor of Science major or the ACS Approved major. The ACS-Approved major is recommended for the student who plans to attend graduate school.

4. The education option chemistry major is designed for prospective secondary school teachers. The curriculum is planned so as to give the student (1) a broad general education, (2) specialized preparation in chemistry with a minor in a supporting field and (3) professional training necessary for effective teaching. In order to be admitted to the College of Education, the student needs to be evaluated and recommended by the Chemistry Education Advisory Committee. working with new materials for applications in aerospace, electronics, medicine, building, and transportation industries. Students completing this option will be prepared to directly enter the chemical industry or go on to graduate school in areas of study such as polymers or material science. The polymer option is based on the ACS-Approved major.

Note: Substitution of other courses for degree requirements is possible upon application and approval by the department. This is on a case-by-case basis and particularly may affect students who change to a chemistry major or who transfer to UWRF. Students should confer with their adviser and/or the department chair.

The Department of Chemistry at UWRF is approved by the American Chemical Society. Students who are interested in pursuing advanced training in chemistry may obtain an ACS-Approved degree by taking several additional chemistry courses. Within the required supporting courses, the calculus-based physics courses 161, 162, 166, 167 are required for the ACS-Approved Option.

Communication Studies Major

Core Requirements: 12 Credits

COMS 106 Interpersonal Communication 3 cr.

COMS 286 Introduction to Communication Studies 3 cr.

COMS 386 Communication Theory and Qualitative Research 3 cr.

COMS 486 Senior Capstone 3 cr.

Goal Requirements: 12-14 credits

Students will take courses to fulfill the five goals of the Communication Studies Program. Courses may be counted in up to two separate goals. For example, if a student takes COMS 308, it may count for BOTH Goal One and Goal Three.

Goal One: Students must take TWO of the following courses to fulfill the goal "Ability to Collaborate."

COMS 206 Family Communication

COMS 308 Small Group Communication

COMS 316 Organizational Communication

COMS 318 Communication and Leadership

COMS 416 Training and Development

Goal Two: Students must take ONE of the following courses to fulfill the goal "Ability to Comprehend Research."

COMS 306 Nonverbal Communication

COMS 319 Freedom to Speak

COMS 440 Gender Communication

COMS 314 Rhetorical Criticism

Goal Three: Students must take TWO of the following courses to fulfill the goal "Ability to be Innovative, Strategic and Effective Communicators."

COMS 206 Family Communication

COMS 211 Public Speaking

COMS 213 Intercultural Communication

COMS 216 Communication in the Interview

COMS 306 Nonverbal Communication

COMS 308 Small Group Communication

COMS 312 Argumentation

COMS 315 Communication and Social Change

COMS 318 Communication and Leadership

COMS 416 Training and Development

Goal Four: Students must take ONE of the following courses to fulfill the goal "Ability to Comprehend Communication Literacy."

COMS 206 Family Communication

COMS 306 Nonverbal Communication

COMS 308 Small Group Communication

COMS 314 Rhetorical Criticism

COMS 315 Communication and Social Change

COMS 316 Organizational Communication

COMS 319 Freedom to Speak

COMS 416 Training and Development

COMS 440 Gender Communication

Goal Five: Students must take TWO of the following courses to fulfill the goal "Ability to Communicate Ethically."

COMS 211 Public Speaking

COMS 213 Intercultural Communication

COMS 315 Communication in Social Change

COMS 318 Communication and Leadership

COMS 319 Freedom to Speak

COMS 314 Rhetorical Criticism

Individual Study Requirements: 3-4 Credits

Students will take one of the following to complement their course of study in consultation with their advisor.

COMS 379 Communication Studies Internship (3-4 hours)

COMS 499 Independent Study (3 hours)

Directed Electives: up to 9 credits

Students must take additional credits in COMS to equal a minimum of 36 credits in the major.

Supporting Course

Students must take either COMS 101 or COMS 116 as a supporting course for the major.

Admission Requirements

For all majors in the College of Business and Economics (CBE): Completion of at least 27 required general education credits with a minimum GPA of 2.25.

Additionally, the following must be completed, or in progress for completion, during the semester preceding admission. Students may register prior to acceptance, but acceptance is required for attendance

Computer Science Option: 56-57 Total Credits

This option has a technical and theoretical emphasis providing students with a comprehensive understanding of software engineering, computing techniques and the underlying theories. Graduates will develop skills relevant to the analysis, design and implementation of sophisticated software/hardware systems and communication networks.

Required Courses: 39 cr. hrs.

CSIS 161 Programming I 3 cr.

CSIS 162 Programming II 3 cr.

CSIS 225 Web Development I 3 cr.

The Creative Writing minor is a preparation for writing for personal pleasure as well as for publication.

This minor can be taken in combination with an English major; however, students should consult this handbook to plan substitutions for overlapping requirements. Students who choose the Creative Writing minor should plan their programs with Dr. Jennifer Brantley or Joseph Rein.

Three options exist for students who select the Crop and Soil Science major: 1) Crop Science, 2) Soil Science, and 3) Sustainable Agriculture. The Crop Science option is designed for students who wish to focus their studies on plants and the use of plants for food, feed and fiber. Students learn about crop management, biotechnology, crop physiology, crop quality, as well as genetics and plant breeding. The Soil Science option is designed for those whose interests include the basic components and properties of soils, soil conservation, soil fertility, soil hydrology, and the management of soils to produce crops in a sustainable way. The Sustainable Agriculture option is the study of economically viable production systems that promote land productivity, energy efficiency,

The Department of Animal and Food Science offers three options for Dairy Science majors. Required core courses within the Dairy Science major are identical, regardless of option. Additional requirements are based on the choice of option. The Dairy Science-Management option is designed for students seeking careers in dairy farm management or supporting industries such as feed, pharmaceutical, or genetics sectors of the dairy industry. The Dairy Science-Science option is designed for students that plan to enroll in graduate or professional degree programs following completion of the Bachelor of Science degree. This option is strongly suggested for students that hope to enroll in a college of veterinary medicine at a future date. The Dairy Science-Minor option is designed for students who wish to supplement their education

Management Option 25 cr. hrs.

CHEM 230 General Organic Chemistry 3 cr.

AGBI 251 Agricultural Biochemistry 3 cr.

DASC 270 Internship I

or DASC 370 Internship II 4 cr.

Choose two from:

AGEC 205 Agricultural Accounting 3 cr.

AGEC 345 Agricultural Law 3 cr.

AGEC 355 Agricultural Markets and Prices 3 cr.

AGEC 360 Farm Management 3 cr.

AGEC 365 Agricultural Finance 3 cr.

AFES 310 Agricultural Human Resource Management 3 cr.

Additional directed electives: 9 cr. hrs.

Students may select any combination of courses offered by Food Science, Agricultural Education, Agricultural Economics, Agricultural Engineering, Plant and Earth Science, Modern Language, or the College of Business and Economics. At least 6 credit hours must be earned from courses at the 200 level or higher.

Science Option 28-30 cr. hrs.

CHEM 122 General Chemistry II 5 cr.

CHEM 231 Organic Chemistry I 3 cr.

CHEM 236 Organic Chemistry Lab I 1 cr.

or CHEM 246 Synthetic and Analytical Techniques in Organic Chemistry I 2 cr.

CHEM 232 Organic Chemistry II 3 cr.

CHEM 237 Organic Chemistry Lab II 1 cr.

or CHEM 247 Synthetic and Analytical Techniques in Organic Chemistry II 1 cr.

BIOL 324 Microbiology 4 cr.

Choose one from the following:

ANSC 447 Endocrinology 2 cr.

BIOL 230 General Zoology 3 cr.

with an academic minor or second major.

General Education Requirements

As listed with the following exceptions:

CS (Communication/Speaking and Listening) designator:

COMS 101 or COMS 116 is required

SL (Scientific Investigation) / S (Sciences) designator:

BIOL 150 is required

CHEM 120 or CHEM 121 is required

Foundation Courses in Agriculture: 12 cr. hrs.

Required Foundation courses:

ANSC 111 Introduction to Animal Science 3 cr.

AGEC 230 Agricultural Economics I 3 cr.

Then select 2 from the following 4 courses:

AGEN 150 Introduction to Agricultural Engineering 3 cr.

PLSC 161 Introduction to Plant Science 3 cr.

FDSC 110 The Science of Food 3 cr.

SOIL 120 Introduction to Soil Science 3 cr.

BIOL 240 Cell and Molecular Biology 3 cr.

CHEM 362 Biochemistry II 3 cr.

CHEM 461 Pharmacology 3 cr.

PHYS 122 General Physics II 4 cr.

PHYS 132 General Physics II 4 cr.

Minor Option 28-30 cr. hrs.

As an alternative to the Management or Science option, students can pair the Dairy Science major with an academic minor to develop a more in-depth understanding of a second area of interest.

Any minor of 22-24 credits or second major (other than Animal Science, Dairy Science, or Ag Studies).

In addition to the minor or second major the following two courses are required:

CHEM 230 General Organic Chemistry 3 cr.

AGBI 251 Agricultural Biochemistry 3 cr.

Dairy Science Minor

Dairy Science Minor 22 total cr. hrs.

Required courses: 18 cr. hrs.

UW-River Falls offers a program in Early Childhood through Middle Childhood for students who are elementary majors with an early childhood minor, which meets certification requirements to teach Early Childhood through Middle Childhood - Regular Education. In addition to providing further enrichment in techniques for instruction in the primary grades, this minor and certification increases the range of potential employment for an elementary education major. Those who may seek employment in existing day care centers, nursery schools, child and family education programs, or those intending to start their own private pre-school, should investigate the opportunities opened via an early childhood minor.

Early Childhood Degree Completion

The environmental science major is designed to prepare students to face challenges in environmental quality management and sustainable development. Environmental science majors are prepared to monitor, model and manage environmental systems in the areas of environmental quality and risk evaluation, sampling and analysis, remediation and regulatory compliance. Graduates pursue careers in environmental consulting firms, local, state and federal environmental agencies or corporations. Students with environmental research interests are also prepared to pursue advanced degrees.

The major is interdisciplinary within the College of Agriculture, Food and Environmental Sciences and the College of Arts and Sciences, and is

The vision of the College of Business and Economics is to be a community of choice and the regional leader in the acquisition, study, application and sharing of business, economics and information technology knowledge. Consistent with this vision, the college is accredited by the Association to Advance Collegiate Schools of Business (AACSB) International.

The finance curriculum is designed to prepare students for successful careers in corporate finance, financial institutions and services, and for graduate study. For example, finance graduates secure jobs in banking, insurance, real estate, the investment industry, financial planning, and risk management.

Geography is a discipline that seeks to understand the world and the interrelationships between humans and their environment. Geographers use data from many sources, analytical techniques, and Geographic Information Systems (GIS) to study and map the changing natural and human landscapes from local to global scales. Geographers approach the world with a multidisciplinary perspective that integrates knowledge from the social and natural sciences. Students can tailor their plan of study to focus on human geography, physical geography, or Geographic Information Science. The department offers a GIS/Cartography minor that covers GIS theory, applications, and map design. Courses are taught in a state-of-the-art GIS laboratory. Geography majors and minors are prepared to pursue advanced degrees and careers in government, consulting, planning, travel, industry, geographic analysis, and map design.

The Department of History and Philosophy offers courses and degrees for those who wish to learn how to read, think and write effectively. **A degree in history is excellent preparation** for careers in business, advertising, government, foreign service, international relations, publications, journalism and human services. It also is indicated for those who wish to pursue a career specifically in the field of history including teaching at the elementary, secondary, or college level, or working in museums, archives and libraries. Students take courses in a variety of periods, areas and topics.

Majors are encouraged to participate in an **internship program** for practical preparation for a career. Various options are also offered for **study abroad** in other countries of the world as part of the degree.

Honors Program

Honors Admission Requirements

Are you an incoming freshman that has been accepted to the UW-River Falls and interested in the Honors Program?

Eligibility for first term, incoming freshman students:

- Composite ACT score of 27 or higher and/or
- Graduated in the top 10% of high school class (a 3.75 for high schools that do not rank)

Are you a current student or are you a transferring to UW-River Falls and interested in joining the Honors Program?

Eligibility for current and transfer students:

- Cumulative GPA of 3.3 or higher with time to complete the Honors Program requirements.

Honors Program Requirements

In order to complete the Honors Program at UW-River Falls, students who have been accepted into the program will take two Honors-specific classes and demonstrate knowledge in five core competencies:

HON 190: Honors Seminar

All Honors students enroll in HON 190 early in their UWRF career, preferably the first semester in the program. Taught by instructors from several departments, this one-credit seminar is the foundational class that explores why each of the five Honors competencies is important and then helps students create a personalized Honors Program plan. We want students to earn as many of their Honors credits as possible as they take classes required for graduation, so nearly all of the Honors credits will count toward degree completion.

Global Engagement/Awareness

All UWRF students must complete a "Global Perspectives" (GP) class in order to graduate, so this class will count in this competency. The rest of this requirement may be earned in a variety of ways: by completing a second GP class, taking a 200-level or above Modern Language class (i.e. Spanish, French, German, Chinese, or Japanese), participating in a credit-

The UW-River Falls Honors Program is designed to meet the educational needs of students who have an outstanding record of academic achievement and a true sense of intellectual adventure. It allows students to experience a variety of course types and educationally related experiences while gaining academic credit.

Students enrolled in the program may choose Honors sections of many general education classes, take introductory and advanced Honors seminars, complete an Honors thesis/project, enroll in a service-learning experience for credit and receive credits for participation in the intellectual and creative life of the UWRF community and elsewhere. All of these experiences are gained while still keeping within the major and minor requirements of an Honors student's academic program.

bearing study abroad experience, or by completing a "portfolio project."

Communication/Rhetorical Skills

All Honors students must have strong reading, writing, and thinking skills; therefore, Honors students will take an Honors- or discipline-specific section of [ENGL 200](#) (a General Education requirement) or will take a class that introduces students to their discipline's language (i.e. [BIOL 160](#): General Biology-Freshman Research Focus, [CSD 160](#): Introduction to Communication Sciences and Disorders, [ENGL 253](#): Introduction to Literary Studies, [PSYC 216](#): Research Methods, etc.). Students will be provided with a detailed list of the Communication/Rhetoric classes when they craft their Honors Program plan in [HON 190](#).

Community Engagement

Being active in the community-whether that is the campus community, your home community, the national community, or the global community-offers a variety of benefits to students; therefore, if students plan on graduating from the Honors Program, they must complete at least 135 volunteer hours prior to graduation. These 135 hours may be split across all four years or done in a shorter amount of time and may be done throughout the year, including over the summer, Spring Break, or J-Term.

Sustainability

Sustainability is the study of three key areas: economic, social, and environmental justice. Since part of our mission at UWRF is to prepare ethical and engaged students, all Honors students will take courses that explore two of the three "pillars of Sustainability" named above. Students will work with their instructor for [HON 190](#) to choose classes in this requirement that also count in their major/minor and/or in their University/General Education requirements-courses from nearly all majors are available to meet this requirement.

Undergraduate Research, Scholarly, and Creative Activity (URSCA)

Another part of our mission at UWRF is to introduce students to the benefits of being involved in research and scholarly activities; therefore, to meet this requirement, students will complete an undergraduate research, scholarly, or creative activity in an upper-level class in their major and/or minor. The class in which the URSCA activity takes place meets this requirement.

HON 497: Honors Capstone Seminar

To complete the Honors Program, all Honors students must take [HON 497](#),

[National Collegiate Honors Council](#)

[Nationwide and International Honors Programs](#)

a class where Honors students meet once per week for 50 minutes to listen and respond to URSCA presentations by their peers in the Honors Program. This class will be taken near the end of their program or immediately after their URSCA project has been completed.

Please Note...

- 1) Nearly all of the classes taken in these competencies will also count in students' major/minor, General Education, and/or University requirements. The credits students need to take to complete the Honors Program outside of graduation requirements are kept to a minimum so that students are not taking "extra" classes to complete the program.
- 2) In order for students to graduate with the Honors Program on their transcript, they must have at least a 3.5 cumulative GPA by graduation.
- 3) Students may NOT double-count courses between the different Honors Program competencies. For example, ESM 251 cannot count as both Communication/Rhetorical Skills and Sustainability.
- 4) The Honors Program Office audits students' progress bi-annually. If students are not making progress toward completing the Honors Program and maintaining a cumulative GPA of 3.3 or higher, they will be removed from the program. *As noted in #2 above, students must have at least a 3.5 cumulative GPA by graduation as a program requirement.*

Marketing Communications Steering Committee: James Pratt, Director, Marketing Communications; Erik Johnson, Digital Film & Television; Grace Coggio, Communication Studies; Mialisa Moline, English; Dan Paulus, Art; David Trechter, Agricultural Economics; David Bonko, Marketing Communications; Amelia Reigstad, Marketing Communications.

The interdisciplinary marketing communications major integrates the activities of advertising, public relations, sales promotion, direct marketing, personal selling and cybermarketing into a single professional field of expertise. Students will develop knowledge and skills in oral, written and visual modes of communication. In addition to an introductory course and senior seminar in marketing communications, students will take courses from as many as seven departments in three colleges. Practical experience with current technology tools and a required internship program ensure that students have not only strong academic preparation, but also

The mathematics department offers two options for mathematics majors, the liberal arts option and the education option. Both are based on a common core curriculum of 18 credit hours.

1. The liberal arts mathematics major is designed for students who desire a general education in mathematics as a background for graduate school or a career related to mathematics.
2. The education mathematics major is designed for prospective secondary school teachers. The curriculum provides the student with specialized preparation in mathematics and professional training required to obtain teacher certification.

Interdisciplinary

The minor in Musical Theatre, offered as a collaborative effort between the departments of communication studies and theatre arts and music, is designed to provide students an opportunity to gain formal training. It includes courses in music theory and performance, dance styles, and stage movement, as well as additional courses in theatrical performance, production and design, with special consideration to their application in creation of and performance in musical production. This minor is available to all students, including music and theatre majors and minors.

Speech Communication and Theatre Arts and Music majors should consult with an adviser and substitute other electives (from the list above) for those required in both their major and minor.

The Bachelor of Music Education (B.M.E.) degree is designed to train and certify public school music teachers. In the B.M.E. degree program, students may elect either a Choral/General Music (K-12) emphasis (includes a piano-vocal option), or an Instrumental/General Music (K-12) emphasis. The B.M.E. degree does not require a minor.

The department also offers a Music Minor (non-teaching) and a Musical Theatre Minor. All applicants for admission to degree programs in music must satisfactorily complete a performance audition. Audition requirements for all performance areas are available from the Music Department. In addition to the performance audition, all transfer applicants must take a music theory and history placement exam. The results of the exam will determine the appropriate course levels. Music students should consult the department handbook, which clarifies course requirements and provides additional pertinent information.

Philosophy: Imtiaz Moosa and Walter Wietzke

Philosophical inquiry aims at uncovering, analyzing, and evaluating the fundamental values and assumptions implicit in various human activities and practices such as science, the arts, religion, morality, and social and political institutions. Its ultimate goal is to develop a coherent view of the world and our place in it. Philosophy focuses on sharpening the ability to analyze, reason, and write effectively.

Applied Physics for Industry and Engineering

Applied Physics for Industry and Engineering provides more flexibility for students to tailor their program to fit future careers. The new version maintains the physics core, reduces the required courses to 17 from 26 credit hours, and adds a requirement to complete a certificate option in at least one of four areas. A second semester of Capstone Design Course is added to provide an extensive design experience. The number of required supporting courses increases in lieu of requiring a mathematics minor.

Applied Physics for Industry and Engineering Option: 45-59 Total Credits

Prepares highly-competitive graduates for industry, graduate school, or starting a new business. Provides a firm physics foundation with written and oral professional communication proficiency, and focused skills in at least one of four selected certificate areas---
Opto-Electronics, Biology, Entrepreneurship, Mechanics.

The vision of the Department of Psychology at the University of Wisconsin-River Falls is to continue providing students with a solid foundation in psychology. We seek to achieve regional and national recognition by offering excellent teaching, fostering research and dissemination of results, promoting global and multicultural perspectives, and preparing alumni for graduate study and professional careers. We will cultivate ethical and social development through our curriculum, student organizations, and community service.

Program Goals

1. Provide students with a multi-disciplinary foundation for thinking about sustainability.
2. Discuss the concept of sustainability from a biogeochemical perspective.
3. Address the social and economic facets of sustainability.
4. Discuss the challenges that face humanity in becoming sustainable.

Learning Outcomes

Students will be able to:

1. Create a personal definition of sustainability.
2. Analyze human impacts on natural systems and processes that affect the ability of humanity to live sustainably.
3. Interpret sustainability issues in the context of element cycles.
4. Compare and contrast the role of public and private entities in creating sustainable societies.

5. Identify facets of social/economic /industrial structures that could be changed to make society more sustainable.

Students who select this minor will learn about sustainable agriculture in its broadest sense, including issues related to maintaining and/or improving crop and animal productivity, preserving environmental resources for future generations, ensuring farm profitability, and ensuring rural community vitality and viability. They learn how to build markets and opportunities for producers, and they help consumers make "green" choices on purchased products.

Sustainable agriculturalists work as producers of value added crops, such as organic produce, grains and meats. Some provide technical support for crop and animal production systems, develop soil and nutrient management plans, work with producers to control insects, diseases and other pests with integrated pest management techniques, market locally-grown food products, and research ways to make agriculture more efficient, environmentally sound and sustainable for future generations.

At UW-River Falls, the Sustainable Management major is housed in the College of Agriculture, Food and Environmental Sciences.

Program Description

The [Bachelor of Science in Sustainable Management](#) is a collaborative effort of UW-Extension and four University of Wisconsin campuses - UW-Parkside, UW-River Falls, UW-Stout, and UW-Superior -

All students enter this program with at least 60 college-level semester credits of transferable coursework with a 2.0 or better grade point average (GPA). In addition to the general education requirements, UW-River Falls students must complete two, university-required courses in American cultural diversity and global perspectives. See list of approved [courses](#).

that provides the knowledge and skills students need to create profitable businesses, vibrant communities, and a healthy environment for Wisconsin, the United States, and the world.

Teaching English to Speakers of Other Languages Major

TESOL Liberal Arts

TESOL Education

TESOL Major - Liberal Arts: 36-38 Total Credits

Foreign Language Requirement:

Candidates must have demonstrated proficiency in language study of a single foreign language, which can occur through two years of high school study, four semesters of university study, or other equivalent means of demonstrating proficiency in foreign language study. This foundation requirement is not included in the number of credit hours needed for the major proper: the foundation requirement of two years of foreign language study is separate from the Directed Electives.

Required Courses: 24 cr. hrs.

ENGL 211 Intro to TESOL: Reading and Writing. 3 cr.

ENGL 220 Structure of English 3 cr.

ENGL 322 Acquisition of Language 3 cr.

ENGL 360 Theory and Methodology of TESOL 3 cr.

ENGL 420 Pedagogical Grammar 3 cr.

ENGL 451 Phonetics and Phonology 3 cr.

ENGL 475 Assessment and Testing in TESOL 3 cr.

Directed Electives 12-14 cr. hrs.

This requirement can be fulfilled through a combination of language study, study abroad, and courses listed in section 5 below or through courses selected from section 5 alone. Appropriate study abroad programs would include those with whom UWRF has associations, such as The Abbey in France, The Hessen Exchange in Germany, Wisconsin in Scotland, Wisconsin in China, and University of Guadalajara in Mexico. TESOL/MODL (French, German, Spanish, for examples) double majors may fulfill the directed electives with 12 credits chosen from the MODL courses listed in section 5 below.

Select among:

1. Language Option: 0-8 cr. hrs.

Select 0-8 credits from among 201, 202, 301, 302, and 401 from one of

General Education Requirements-Liberal Arts

B.A. and B.S. Liberal Arts Majors

As listed with the following exceptions:

Social and Behavioral: It is RECOMMENDED that TESOL majors and minors include PSYC 101 among their three social science courses.

Mathematics: It is RECOMMENDED that TESOL majors and minors take PSYC 201, Behavioral Statistics, to fulfill their mathematics requirement.

TESOL Major-Education 36-38 Total Credits

Foreign Language Requirement:

Candidates must have demonstrated proficiency in language study of a single foreign language, which can occur through two years of high school study, four semesters of university study, or other equivalent means of demonstrating proficiency in foreign language study. This foundation requirement is not included in the number of credit hours needed for the major proper: the foundation requirement of two years of foreign language study is separate from the Directed Electives.

Required courses: 27 cr. hrs.

ENGL 211 Introduction to Language and Linguistics 3 cr.
ENGL 220 Structure of English 3 cr.
ENGL 322 Acquisition of Language 3 cr.
ENGL 360 Theory and Methodology of TESOL 3 cr.
ENGL 373 Techniques in Tutoring: TESOL Practicum 3 cr.
ENGL 420 Pedagogical Grammar 3 cr.
ENGL 450 Non-Native Speakers of the Midwest 3 cr.
ENGL 451 Phonetics and Phonology 3 cr.
ENGL 475 Assessment and Testing in TESOL 3 cr.

Directed Electives: 9-11 cr. hrs.

This requirement can be fulfilled through a combination of language study, study abroad, and courses listed in Section 5 below or through courses selected from Section 5 alone. Appropriate international programs would include those with whom UWRF has associations, such as Shih Hsin University in Taiwan, The Abbey in France, The Hessen Exchange in Germany, Wisconsin in Scotland, Wisconsin in China, and University of Guadalajara in Mexico. TESOL/MODL (French, German, Spanish, for examples) double majors may double count up to 12 credits of MODL language courses in this directed electives section with any combination of credits chosen from section 5 below.

Select among

1. Language Option: 0-8 cr. hrs.

Select 0-8 credits from among 201, 202, 301, 302, and 401 from one of the following languages: Chinese, French, German, Japanese, or Spanish. (Students cannot double-count courses taken to satisfy the foundation language requirement above for this directed electives category.)

2. Semester Abroad Research: 0-6 cr. hrs.

A TESOL-based ENGL 378 or any department's 378, that is based in the discipline of TESOL and has an advisor or co-advisor from TESOL may be used to fulfill this requirement with prior approval. Requires department approval and may be added to a student's DAR by program exception signed by the chair of the Department of English.

3. Semester Abroad: 0-6 cr. hrs.

INTS 377

Credits earned in Semester Abroad or the International Traveling Classroom could be used to meet this requirement. Courses other than INTS 377 need to be approved prior to engaging in the experience as appropriate to the TESOL major by the chair of the Department of English and may appear in this category on the DAR by program exception form signed by the chair.

4. Select from the following courses: 0-6 cr. hrs.

ENGL 379 Cooperative Education and Internship II 3 cr.

MODL 376 Mexico: A Cultural Experience 3 cr.
