

# THE STUDENT VOICE

VOL. 7.

RIVER FALLS, WISCONSIN, WEDNESDAY, SEPTEMBER 13, 1922.

NO. 1

## Sun Shines Again for Football Glory

### Changes In the Grading System

#### New Method of Marking

The letter system of grading will be used this year to record all standings. In connection with it, grade points will be introduced to determine the student's scholarship. The standings, equivalent grades, and grade points allowed in each case are as follows:

Standing, A; Equivalent grade, 100-93; Grade points, 3 for each credit hour.

Standing, B; Equivalent grade 92-85; Grade points, 2 for each credit hour.

Standing, C; Equivalent grade, 84-77; Grade points, 1 for each credit hour.

Standing, D; Equivalent grade, 76-70; Grade points, 0, lowest passing grade.

Standing, Condition; Equivalent grade, 69-65.

Standing, Incomplete.

As many grade points will be required for graduation as there are credit hours in the course in which the student is enrolled. That is, a student in an eighty hour course must have not less than eighty grade points in order to graduate. This means that a student must maintain a C average in order to be a candidate for graduation.

An incomplete will be given only when failure to complete the required work of the course is due to no fault on the part of the student.

A condition will be given to students whose final grade falls between 69-65, or whose work is incomplete due to lack of effort on the part of the student.

Incomplete and conditions must be removed within the next semester of attendance. At the expiration of this period, all incomplete and conditions not removed automatically, become failures.

Prof.—Gentlemen, I am dismissing you ten minutes early today. Please go out quietly so as not to wake the other classes.—Yale Record.

### FIVE OF THE BEST

#### LETTER-MEN BACK

#### New Prospects are Pick of Country

Never has our football line-up looked brighter than this fall. Some of the school's whirlwind letter men are scheduled for the 1922 eleven. Most of them are already well known by River Falls students. These tried team are leading numbers.

Joe Gurnoe, '20, who played end and did our spectacular kicking, and receiving year before last, will be here in flying colors. Joe was one of the first to draw his paraphernalia and is on his toes to be off.

Jack Gerretson, '20 and '21 will hold a half-back position. Nobody who has ever seen Jack get into a game can possibly forget his fighting qualities. He has spent several weeks in the great north woods, and feels more equal to the job ahead than in other years. Jack is not "hard" but he is like a rock.

"Tarzan" Lipke, '21, the great fearless tackle, is also one of the men of last year's team which kept heart against so much discouragement till the tables were turned at LaCrosse. He who hits our line near old Tarzan will know he has connected with a player who is straight man.

Ed. Casey, '21, guard, the fighting Irishman from New Richmond, will be on deck to protect the laurels of the green. He is a steadfast player with a business head for backing.

"Poge" Moline, '21, center, lives on football. Nothing can a man do better than the thing he likes to do best. Remember when from the sidelines we used to see old Poge slip under the offense, and nail the man carrying the ball? That's what counts.

Here are some men of whom good performance is expected: Baake, who never quits; Hanson, 240 pound lineman from St. Olaf's College; Cole, a consistent player of last season's line-up; Hank Smith, a local man of over 200 pounds; and Gardner, Elmwood's famous basketball star, who has also experienced some football bumps. Johnson and Smith of Mondovi are prospects who will most likely be heard from before the season advances very far. Heffron and Mc Andrews, of New Richmond, are well

### Improvement on School Buildings

#### Normal Cafeteria Entirely Remodeled

Directly after the close of summer school, the remodeling of the Normal Cafeteria began. The work is now nearing completion although there is yet considerable equipment to be installed. The kitchen and serving rooms have been entirely remodeled, making better service possible. A new storage room has been installed, which will simplify the ordering of foodstuffs by the management.

#### Central Heating Plant Being Constructed

The central heating plant, by which all the Normal buildings are to be heated, is also on the road to completion. A great deal of the work on the building has been done during the summer months, and, although there is yet a great deal to accomplish, the expectations are that the plant will be ready for use about November 1.

This plant will insure evenly heated rooms throughout, and will therefore be a great improvement to the Normal school buildings.

known for their athletic ability in this section of the state. They should make some real additions to River Falls teams.

Ernest Ziebell and Walter Reincke, both of Wausau, a city which has supplied us many excellent men, are expected to make the turf fly in the 1922 mix-ups. Ziebell is one of the fast quarterbacks of Lawrence College. We shall know more of these men soon.

Many members of last season's loyal teams have signed up for work. Who knows but that there will spring to light some genuine finds among these husky fighters. They have gone through hard training, and there is no reason why some regular football eaters should not come of them.

Our printers think we have an extraordinary good-looking bunch of women at school this year. So do we.

## Editorial

### WHAT THE SCHOOL ASKS OF YOU

All educational institutions have traditions and unwritten laws, perhaps they may be called habits of the school, which all students coming to its doors are asked to comply with. The River Falls Normal School requires no impossible thing of any of its students. Usually the first thing called for is a party of some sort by which the entire enrollment may assume a feeling toward each other as in a great family. This effort is to start the friendly spirit of mingling, democratically, among the students.

It will be of interest to new students and those who may have outgrown their school associations during vacation to know of the attitude and conduct most acceptable to the school curriculum. We are not a stiff formal group, ever seeking some slight breach of etiquette to gossip about. The kind of a bunch for our campus is a lively one, in for a good time when it is called for, and ready to work without childish grumbling when work is doled out to them. May our students never have to stoop to the level of small, mean, and dirty gossip for personal amusement.

We want a group of people who are not afraid to grasp a little responsibility when it comes to student organizations, or any other place where a pinch of "carry-on" grit is needed. This organization work should be more broadcasted among members than has been the case. You are not to be pushed into taking too much of this outside work; but a measure of it, such as your judgement tells you is correct, should be indulged in for individual gain. Upon fin-

ishing a course here, the associations of organization activities are sure to help more than can at present be realized.

Now, the type of crowd everybody wants around here this year is one full of life and punch. Here is a chance to expend some of that vim that most young people store up years ahead of time for just such an occasion as you are to be offered. When our teams get out there on those athletic fields, we shall need a bunch of rooters that can yap like coyotes. It is the life a class shows that makes it stand out over others. The proposition is up to us to make this year one that they turn back to.

### DIRECTIONS TO STUDENTS

The following directions will help students in finding the various classrooms and offices:

The president's office and the general offices of the school are on the second floor of North Hall. The auditorium is directly across the corridor from the offices. The classrooms of the agriculture department will be found in the basement of North Hall. The office of Mr. May, director of the agriculture department, will be found next to the president's office. The science department classrooms and laboratories are situated on the third floor of North Hall. The grades of the training school department are situated on the first floor of North Hall with the fifth and sixth grades on the second floor. The office of Mr. Davee, director of the department, is on the first floor of this building. The entrance to the Men's Gymnasium will be found in the basement opposite the South Entrance. The office of Mr. Eggebrecht, physical director, is directly across the corridor from the gymnasium.

The library is situated in South Hall on the second floor. The Dean of Women's office is on the west corridor beyond the library. The classrooms for the English Department, the History department, and the Rural department are all found on this floor, Mr. Russell Johnson, principal, will be found on the third floor of South Hall. The drawing department and the music department will be found on the west corridor, first floor, South Hall. The classrooms used by the mathematics department will be found on the East corridor of the first floor of this building. The foreign languages is also on the first floor directly west of the main entrance. The Home Economics department, is found in the basement of South Hall, near the East door. The cafeteria occupies the west end of the basement and will be reached through the east door of this building. The Geography classrooms will be found on the left of the South corridor of the first floor. The Women's

gymnasium and the office of the directress of physical training for women, will be found at the end of the South corridor, of South Hall.

The work in Agriculture Mechanics is conducted in the shops in the frame building on the West Campus.

The Heads of the various departments who will make student's programs, will be found in the following rooms: Professor Karges, High school and college departments, Physics Laboratory, third floor, North Hall. Professor Hunt, Supervisors and Principals department, opposite office, North Hall. Professor Davee, Practice assignments, First floor, South Hall. Professor May, director agriculture department, Biology laboratory, third floor, North Hall. Professor Davidson and Miss Bridges, Primary and Intermediate departments, History room, opposite library, South Hall. Professor Goble, Department for Grammar Grade Teachers, classroom, east corridor, near the library. Professor Junkman, first three years of the five year course, classroom, left of main entrance, first floor, South Hall.

"Her handshake reminds me of the Boston Garter."

"Howzat?"

"Velvet Grip."—Voo Doo.

Tourist (gazing at a volcano)—Looks like hell, doesn't it?

Native—How these Americans have traveled!—Harvard Lampoon.

## NORMAL MEN WELCOME!

To the School  
To the Town  
and to

H. A. Hagestad's  
MEN'S FURNISHINGS

We carry a complete line of  
**School Supplies**  
Freeman Drug Co.

*Society*

**SCHOOL ORGANIZATIONS**

It would be a difficult task to say which organization of the school is the most valuable, for every one fills a special need. Every student ought to belong to one of the three Christian Associations and to as many more societies as he can. If one has not the time nor inclination to attend a large percentage of the meetings of the society and to do what he is asked to do willingly and carefully, he ought not to join. The different organizations do not want "dead" members simply to show a large roll call.

It is very much worth one's while to join one or more societies. The classes are not the only educational factors of our Normal School, for in the organizations one will gain experience in meeting people, in speaking before an audience, and in parliamentary practice. You new students will not want to miss the good things that are in store for you in the different clubs and societies.

**CIVIC CLUB**

The colleges are growing more and more to have as one of their societies a Current History or like organization. In our Normal this is the Civic Club. It is an open forum for the discussion of present day problems vital to society. Each meeting is conducted as informally as can be allowed; the result is a snappy and intelligent discussion of the topic. There is the added attraction of at least one jolly social time each semester. Come out to a Civic Club meeting and find out for yourself how interesting it is.

**CAMERA CLUB**

Mr. Jacobson, professor of physics, is the enthusiastic advisor of the Camera Club. The members spend their time very profitably, for they learn how to operate a camera, develop

films, print pictures, and make enlargements. The Club furnishes many a picture and photographer for the Meletean.

**AURELIA**

A literary society is usually one of the first organizations started in a school of college rank. The Aurelia, the girl's literary society of the R. F. N. S., has for its purpose the promoting of an appreciation of the best in literature. The meetings, held twice a month, are entertaining as well as instructive. Several social events are put on during theyear.

**"UKE" CLUB**

Just a year ago several of the girls who were ardent "uke" musicians, started the newest club of the school. In its one short year it has made good; it has furnished peppy little songs and stunts at many an entertainment and society meeting.

**G. O. P.**

The G.O.P. is not a political organization as you might think from its name; it works to promote school spirit. In any athletic event the G.O.P.s are on hand to arrange all the "trimmings" necessary as a background to the good work our boys do.

**JUST GIRLS**

Every girl is a member of this society the moment she enrolls. Its purpose is the promotion of fellowship and cooperation between the women of the faculty and the girls, and among the girls themselves.

**KULSTAD BROS.**

Successors to W. H. S. Johnson

This store has been headquarters for students' wearing apparel for the past ten years.

For unlimited choice in suits, overcoats, furnishings, hats, caps and shoes, see us.

Suits hand pressed.

**KULSTAD BROS.**

**GIRL'S ATHLETIC ASSOCIATION**

The G.A.A. conducts the girl's sports throughout the year. Excellence in these sports is rewarded by credits, 600 of which is necessary to earn the official G.A.A. sweater. This past year 6 girls were awarded their sweaters. A week end of camping on the St. Croix is an additional attraction to joining. Over 100 girls registered for sports the 1921-22 year.

**MUSIC ORGANIZATIONS**

The department of music desires to reorganize its clubs, Girls' Glee Club, Men's Glee Club, Band and Orchestra, at the earliest possible date. Students who desire membership in any of these clubs should make application to Mr. Powers or Miss Wind, room 25, South Hall. A two-hour credit is given for glee club and orchestra service. The glee clubs will begin the study of a cantata or an operetta as soon as organization is completed.

**Welcome, Normal Students**

We have been waiting for you and we are glad you are here. Now please don't get the idea that it is only your money we want, although we admit that is welcome. We like your youthful spirit, your air of refinement and good fellowship and we believe you will like the hospitable atmosphere of our store.

Come in and make yourselves at home. Take advantage of our facilities for your accommodation and your service.

We have the largest store in this part of the state and we can fill your needs in everything to wear or eat. We are just opening a large millinery department on the balcony and also have a large assortment of phonograph records there.

Our balcony is a pleasant, light, well ventilated place with many of the comforts of home and always somebody to talk with you.

You are invited to make use of it. And don't forget the "eats", you will like our grocery department.

## Assorted Wit

We had forgotten football until we saw a doctor whistling.

Besides being school month, September has five bath nights.

A man never loses his nerve until he needs it.

We saw a man in a cap talking through his hat.

The woman who marries for money works more than eight hours a day.

If we all got what we are worth, there wouldn't be enough.

Every man is the architect of his own future.

Mother—Gladys, you stood on the porch quite a good while with that young man last night.

Gladys—Why, mother, I only stood there for a second.

Mother—But I'm sure I heard the third or fourth.—Minnesota Foolsap.

### OBSTACLES OF HUMANITY

Man may level a few mountains, but never can he lower them all to his specified grade.

### THE "MATTER WITH" AMERICA

What's the matter with America these days?

Too many diamonds, not enough alarm clocks.

Too many silk shirts, not enough blue flannel ones.

Too many pointed-toed shoes, and not enough square-toed ones.

Too many serge suits and not enough overalls.

Too much décolleté and not enough aprons.

Too many satin-upholstered limousines and not enough cows.

Too many consumers and not enough producers.

Too much oil stock and not enough savings accounts.

Too much envy of the results of hard work and too little desire to emulate it.

Too many desiring short cuts to wealth and too few willing to pay the price.

Too much of the spirit of "get while the getting is good," and not enough old-fashioned Christianity.

Too much discontent that vents itself in mere complaining and too little real effort to remedy conditions.

Too much class consciousness and too little common democracy and love of humanity.—Exchange.

### REGISTRATION

Registration yesterday was very heavy for the first day. Indications are that the total enrollment will be unusually large. More students than ever before come in from surrounding high schools. The large enrollment will be somewhat reduced by the number of local students who have been taking high school work at the nor-

mal and who are transferring to the city High School.

"How did you like the girl you took home from the dance?"

"Awful."

"I couldn't kiss her either."—Lake Forest Stentor.
